DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 are drawn to a composition comprising perillyl aldehyde and at least one inactive ingredient, classified in class 514, subclasses 693 and 729.
- II. Claims 25-34 are drawn to a method of inhibiting the growth of bacteria and fungi by application of a composition having at least in active ingredient and at least on inactive ingredient, classified in class 514, subclasses 693 and 729.
- III. Claim 35 is drawn to a method inhibiting the growth of microbe infecting a host by an application of PCO and POH, classified in class 514, subclass 693 and 724.
- IV. Claim 36 is drawn to a method of inhibiting the growth of bacteria or fungi infecting a host by an application of PCO and SDS, classified in class 514, subclass 693.

The four inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their separate subject matter for inventive effort. Further, a reference which anticipates any one of the above inventions would neither anticipate or make obvious of the other inventions. Each such invention

Art Unit: 1614

is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

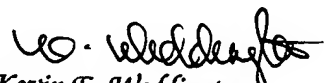

The applicants are required to elect a single invention for examination purposes.
